

LaRosita

Selected Walnuts

SELECTED WALNUTS

Our company is the third generation of a family of growers, located at the foothills of the Andes Mountains in Uco Valley, Mendoza, Argentina. We are producers, processor and exporters of high-quality walnuts.

We have always believed that high-quality walnuts can only be produced if the tree is located at the best terroir, that's why LA ROSITA is located in the growing region of Tupungato at 1.100 m / 3.600 f a.s.l. in Uco Valley, Mendoza, Argentina. We have been producers for more than 50 years.

Generation after generation we have respected patterns that today confirm our philosophy.

1. Own plantations

2. Work hard

3. Sustainable agriculture

In order to supply high-quality walnuts, we integrate sustainable agriculture with the required technology.

We recently acquired integrated processing technology that washes, calibrates and dries the nuts under specific and previously agreed parameters, since each lot harvested arrives from the trees with different levels of humidity. Selection is done by hand. After that, we store, package and crack in our own facility.

Variety

Process

Artificial drying at max. 30°C.
Washed: Hand selection and removal of main defects. Washing process with water before packing. Air and hand sorting.

Packaging

Storage Conditions

10°C ± 3° and 55% RH ± 5%, in a clean, cool, and dry place, away from strong odors, cereals, and other sources of contamination (vectors and insects)
